MID SIZE SERIES Rough Terrain SCISSOR LIFTS

The Mid-Size Series Rough Terrain Scissor Lifts combine solid and powerful design elements to meet the demands of any job site environment. All models are equipped with Skyjack's unique axle based 4WD system which features a "Detroit Locker" type rear differential and limited slip front differential for unmatched terrainability.

Working heights for these two models are 49' (SJ 8243) and 56' (SJ 8850), while capacities are 1,000 lbs (SJ 8243) and 800 lbs (SJ 8850) respectively.

A standard 4.5' roll out extension deck adds to the already generous platform sizes, giving a combined 75 square feet of platform space. Both models are drivable at full height, and feature 30% gradeability.

Consistent with Skyjack's robust and reliable design features, the Mid Size Series Rough Terrain Scissor Lifts utilize Skyjack's standard color coded and numbered wiring system with analog based controls.
